Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Choy (EP 1301491) in view of Leenders et al (USPN 5,568,173).

With respect to claims 1-19, Choy discloses an apparatus and a method of enhancing color space comprising:

- A pen set configured to depositing dye based ink and fixer on a print medium in a print zone ([0028], [0025])
- The depositing dye based ink and fixer further comprises underprinting the fixer on the print medium and then depositing the dye based in n the print medium (Fig.2)
- A pen set is configured to depositing a layer of the fixer over the deposited dye based ink ([0028])
- Print medium comprises plain paper ([0025])
- Applying heat to the print zone after the depositing dye based ink ([0029])

- Applying heat to the print zone prior to the depositing dye based ink and fixer ([0029])
- The depositing is effected by one pass print mode, two pass mode ([0028])

However, Choy fails to teach the temperature is between about 45 and 85 or 45 and 55 degrees.

Leenders et al teaches the temperature is between about 45 and 85 or 45 and 55 degrees (Column 11: line 5-8).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to heat at the temperature as taught by Leenders. The motivation of doing is to obtain a desired optical density increase.
